**We encourage you to record all birds seen and heard.**

Are you reporting a complete checklist of the birds seen and heard?  YES  NO

## Submitting Your Data

After you have completed your bird count, submit your data to eBird Caribbean at <http://ebird.org/caribbean>

## Defining Your Count

**Stationary Count:** A count made from a fixed location (moving less than 30 m). Examples are counting birds from an observation tower or in your backyard.

**Traveling Count:** Observations made while birding over a specific distance (preferably less than 5 km) and duration. Examples include walking a trail, driving an auto loop, and birding on a boat trip. If you walk 2 km. on a trail and return via the same route, record the distance as 2 km. Only record new birds that you are certain you did not previously detect on the return.

**Caribbean Waterbird Census (CWC) Counts:** Any count at a wetland (including swamps, marshes, mangroves, salt ponds, salinas, beaches, mud flats, tidal flats, estuaries, lakes, bays, etc.) should be entered as a CWC Point Count (= Stationary Count) or Area Search in Step 2 of data entry at <http://ebird.org/content/caribbean/>

The USFWS Neotropical Migratory Bird Conservation Act Program funded this project.

# Checklist of the Birds of Cockpit Country, Jamaica

- Red** – Endemic species, Jamaica
- Green** – Endemic species, West Indies
- ^** – Introduced species
- \*** – Year-round resident

**Note:** This is a list of the birds most likely to be seen in the Cockpit Country of Jamaica, including wetland birds that occur in river habitats. It does not include all rarely observed species.
